PERFORMANCE MEASURE FOR THE MOUND SITE SOURCE REMOVAL PROJECT (KH-00003NS1A)
- AMT-047-97

The purpose of this correspondence is to document the successful completion of the first two elements of Performance Measure No 97-C6 12R for the Mound Site Source Removal Project

Environmental Protection Agency correspondence from Tim Rehder to Gail S Hill, received on February 13, 1997 (Attachment 1), provided approval of the Final Proposed Action Memorandum for the Mound Site Source Removal Project, which was identified as 5% of the Performance Measure fee on the Rating Plan

Excavation at the Mound Site, which was identified as 10% of the Performance Measure fee on the Rating Plan, was completed on April 10, 1997 (Attachment 2) Approximately 700 cubic yards of VOC contaminated soil was excavated from the Mound Site and stockpiled within the Contaminated Soil Feed Stockpile in the east trenches area awaiting treatment using low temperature thermal desorption Thermal desorption is scheduled to begin in mid-June, 1997

Formal closure work for the Performance Measure will be initiated once completion of all of the elements have been achieved If you have any questions, please contact me at 966-4829 Thank you for your continued support of the Environmental Program

Sincerely,

AMT
